

Declaration Document of 18650B4 Model No

To Whom It May Concern:

We, LG Chem Ltd., hereby declare following things to all of our customers.
The model number on certificates, specifications and cartons are same.
Also, the quality and performance of cell has no difference.

- Model No. : ICR18650B4
: INR18650B4

The reason of the model no. difference

- LG has used the NCM cathode material to produce the 18650B4.
- According to the IEC certification nomenclature, the model no. of 18650 cell using the NCM cathode material must be started in INR . But it is not mandatory.
- So LG has been used the model no. ICR commonly to all 18650 models.
- However, some customers requested to change the model no. from ICR to INR according to the IEC certification nomenclature a few years ago.
- So LG has changed the model no.of 18650 cell using NCM cathode material from ICR to INR

Sincerely,
