

# Protection Circuit Module Specifications For 3.2V LiFePO4 Battery Packs

Model: PCB-LFP3.2V4A

| No. | Test item (Ta = 25°C)     | Criterion  |
|-----|---------------------------|--|
| 1   | Voltage                   | Charging voltage<br>DC: 3.6V CC/CV                 |
| 2   | Current                   | Current consumption<br>$\leq 10 \mu A$             |
|     |                           | Maximal continuous discharging current<br>4A       |
| 3   | Over charge Protection    | Over charge detection voltage<br>3.90±0.025V       |
|     |                           | Over charge detection delay time<br>0.96S - 1.4S   |
|     |                           | Over charge release voltage<br>3.80±0.025V         |
| 4   | Over discharge protection | Over discharge detection voltage<br>2.0±0.05V      |
|     |                           | Over discharge detection delay time<br>115 - 173mS |
|     |                           | Over discharge release voltage<br>2.3±0.05V        |
| 5   | Over current protection   | Over current detection voltage<br>0.1±0.15V        |
|     |                           | Over current detection current<br>4.5-7.5A         |
|     |                           | Detection delay time<br>7.2 - 11ms                 |
|     |                           | Release condition<br>cut load                      |
| 6   | Short protection          | Detection condition<br>Exterior short circuit      |
|     |                           | Detection delay time<br>100-500us                  |
|     |                           | Release condition<br>cut load                      |
| 7   | Resistance                | Protection circuitry<br>$\leq 50 m\Omega$          |
| 8   | Temperature               | Operating Temperature Range<br>-40~+85°C           |
|     |                           | Storage Temperature Range<br>-40~+125°C            |

IC: S-8261ACEMD-G4ET2G (SEIKO)

L28\*W5\*T2.5mm

MOSFET: AO8810\*2 (Alpha & Omega)
